### Skills Summary

### About Me

I have acquired an education in the field of information technology and have completed courses in **Python**, **Django**, and **Docker**. My proficiency in the **Linux** operating system enables me to operate across diverse environments. I am also skilled in front-end development with **CSS** and **HTML**. For task scheduling, I utilise **Celery**, while **Docker** is my go-to for the rapid development, testing, and deployment of applications.

Throughout my professional experience, my responsibilities have encompassed:

- Developing and maintaining software using **Python** with the **Django** framework.
- Engaging in the design, development, and debugging of program code, including testing and troubleshooting the software developed. In this process, I have employed the version control system **Git**.
- Managing databases, specifically working with **PostgreSQL** and **MongoDB**.
- Integrating third-party services via **APIs**.
- Deploying and managing the project on VDS servers.

### Experience

#### Manager at a transport company.

2018 - 2022

- Working with the LocTracker program.
- Working in a team.
- Communication with customers.

#### Freelance

2022 - 2024

- Development and support of software in Python using Django.
- I created several online stores.
- Wrote a merchandising application for checking the quality of goods using aiogram.

### Education

#### Belarusian State University of Transport

2012 - 2018

Bachelor of Mechanical Engineering
